

Authorized ADL's Units

Product Code: ADL

Weight: 55.00kg

Dimensions: 680.00cm x 640.00cm x 178.00cm

Short Description

ADL's power products have been used all over the world for more than 20 years. With their excellent automatic arc suppression function, very good reliability and very competitive prices, they are very popular in the market.

Description

ADL was established in Riedstadt, Germany in 1992, and is a well-known developer and manufacturer of sputtering power sources in the coating industry. Its products are widely used in flat panel display, glass decorative coating, industrial coating, optical coating, tool coating, microelectronics and other industries.

2011 Overall relocation to a new factory in Darmstadt (near Frankfurt International Airport).

ADL's high-tech innovation concept, the production of power products with high quality, high reliability, long life is known. The power products produced strictly follow the German manufacturing concept and are 100% made in Germany.

ADL has sold more than 30,000 power supplies worldwide and used more than 6,000 units in mainland China. The earliest to enter the Chinese market is to enter the coating equipment with Applied Materials.

Hunan Zhongyuan Technology Co., Ltd., as an excellent domestic agent of the German ADL power brand, has long provided our customers with high-quality products and considerate services.

ADL's products are mainly used in the following industries:

- * Flat panel display industry - the highest to the most advanced G11 generation line
 - * Glass Coating-Low E
 - * Solar - CIGS/PECVD
 - * Tool coating/Decorative coating
 - * Semiconductor microelectronics industry
 - * Optical coating
 - * Various scientific research institutions
- Various other applications...
